Art Unit: 3735

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 58-74 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims contain language that is not supported by the originally filed specification. Claim 58 is directed to "A method for determining a fitness level of an individual", however the specification does not in any way discuss the fitness level of a person nor a method to determine such a level. Claim 58 also includes language directed "a delta heart rate", "a base heart rate", "a peak heart rate", "a recovery time", "cycle parameters", there is no disclosure of "assigning a value to a fitness level" or any of the steps directed to the assigning step such as "weighting", "summing" or "performing a quadratic regression analysis to obtain at least one goodness of fit value", which all lack support in the originally filed specification. In claim 69 some of the same terms lack support in the originally filed specification along with any support for a system for assessing an individual's "physiological condition" and "a catalog". Further many of these terms are indefinite in that it is unclear what the limitations of such terms are in ascertaining the metes and bounds of the claim language. These are only a few examples of language that is not properly supported.

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
